The MT 300EX is our new addition to the MT300 ATM model. This machine has the same great features as the MT 300 and also offers a larger, extended cabinet for holding more bills. It features a 7" color LCD display and a 2" thermal printer. This ATM comes with the DeLaRue SDD 1700 dispenser having a 2000 note capacity. The MT 300EX utilizes a compact compact flash technology for simple program updates.

The MT300EX uses the secure and stable Linux Operating System. While meeting all security requirements, this machine also has a Visa/PCI Encrypting PIN Pad and is Triple DES compliant.

This American made, all metal cabinet makes this ATM one of the most durable in the industry.
