IN-HOUSE LEASE

Lease rate factors are as follows

Months	Rate
24	.0510
36	.0371
48	.0304

The first and last months payments are collected at the signing of the lease. Once the lease is at the end of the term the customer can buy out the lease for one dollar. When you own your machine MoneyTree will not collect any more payments except the \$8.00 a month processing fee (this is with any lease or purchase of an ATM machine).

Below is an example to figure your monthly payments if you chose to go with MoneyTree's In-house leasing program. All payments may be different due to price changes on machines, shipping costs and additional signs, etc. that can be purchased with the machine.)

Example:

Selling Price: \$2495.00
Time of Lease: 36 months
Monthly Price: \$92.56

$2495.00 \times .0371 = \$92.56$ monthly payments
